

EXOTIC PET

EMERGENCY BLOOD DONATION

Your Pet Can Give The Gift Of Life!

Many pet parents aren't aware that, just as in human medicine, blood products are a life-saving resource for critically sick or injured exotic pets. Time is of the utmost importance when blood and plasma products are required, and can often be difficult (and sometimes impossible) to find. Exotic pet blood is urgently needed in emergent situations and we are seeking local donors willing to help save the life of a severely ill patient (without much notice) in our Robbinsville, NJ facility.

The Benefits Of Pet Blood Donation

Becoming an emergency blood donor super hero is a special and unique opportunity and NorthStar VETS® wants to show our appreciation by giving back to you and your pet. We provide all of our exotics animal blood donors with:

- A complimentary and thorough physical exam prior to donation
- A **FREE** comprehensive blood screening panel, including a copy of all lab work for your records
- 10% off any future NorthStar VETS® bills you may incur (within one year of your pet's blood donation).

Donor Species Needed

- Parrots
- Chickens
- Ducks
- Guinea Pigs
- Ferrets
- Rabbits
- Turkeys
- Hedgehogs
- Chinchillas
- Reptiles

If interested in being placed on our emergency contact phone list, email:

Jeanette Malatesta

Exotics Client Liaison

jmalatesta@northstarvets.com

Please Include:

- Donor Name, Age, Species
 - Your email address
 - Your contact phone number
 - Your address / location
- (due to critical urgency, blood donors must reside within a 60 minute commute to our Robbinsville hospital in Mercer County, NJ).*

NOTE: Mild sedation or anesthesia would be needed for donations
